Introduction	i
Wassenaar Public Statement	1
Wassenaar Initial Elements	3
Wassenaar Dual-Use List	
General Technology Note	33
General Software Note	34
<u>Category 1 – Advanced Materials</u>	
A. Systems, Equipment, and Components	
1A1 Fluorinated compound components	35
1A2 Composite structures or laminates	35
1A3 Manufactures of non-fluorinated polymeric substances	35
1A4 Protective and detection equipment and components	35
1A5 Body armor	36
B. Test, Inspection, and Production Equipment	
1B1 Production of fibers, prepregs, preforms, or composites	36
1B2 Production of metal alloys, metal alloy powder or alloyed materials	36
1B3 Superplastic forming or diffusion bonding titanium or aluminum or their alloys	36
C. Materials	
1C1 Absorbers of electromagnetic waves or intrinsically conductive polymers	37
1C2 Metal alloys, metal alloy powder, and alloyed materials	37
1C3 Magnetic metals	38
1C4 Uranium titanium alloys or tungsten alloys	39
1C5 Superconductive composite conductors	39
1C6 Fluids and lubricating materials	39
1C7 Ceramic base, non-composite ceramic, ceramic-matrix composite, and precursor materials	40
1C8 Non-fluorinated polymeric substances	41
1C9 Unprocessed fluorinated compounds	41
1C10 Fibrous or filamentary materials	41
1C11 Metals in small particles and boron or boron carbide	42
1C12 Plutonium and neptunium	43
D. Software	
1D1 Development, production, or use of 1B	43
1D2 Development of organic matrix, metal matrix, or carbon matrix laminates or composites ..	43
1D3 Enable equipment to perform under 1A4c	43
E. Technology	
1E1 Development or production of 1A1b, 1A1c, 1A2 to 1A5, 1B, or 1C	43
1E2 Other technology	43
<u>Category 2 – Materials Processing</u>	
A. Systems, Equipment, and Components	
2A1 Anti-friction bearings and bearing systems	45
B. Test, Inspection, and Production Equipment	
2B1 Machine tools	46
2B2 Numerically controlled optical finishing machine tools	47

2B3	Numerically controlled or manual machine tools	47
2B4	Hot isostatic presses	47
2B5	Deposition, processing and in-process control of inorganic overlays, coatings and surface modifications	47
2B6	Dimensional inspection or measuring	48
2B7	Robots	49
2B8	Assemblies or units for machine tools or dimensional inspection or measuring	49
2B9	Spin-forming and flow-forming machines	49

C. Materials – None

D. Software

2D1	Development, production, or use of 2A or 2B	49
2D2	Electronic devices functioning as a numerical control unit	49

E. Technology

2E1	Development of equipment or software by 2A, 2B, or 2D	49
2E2	Production of equipment by 2A or 2B	50
2E3	Other technology	50

Category 3 – Electronics

A. Systems, Equipment, and Components

3A1	Electronic components	61
3A2	General purpose electronic equipment	67
3A3	Spray cooling thermal management systems	68

B. Test, Inspection, and Production Equipment

3B1	Manufacturing of semiconductor devices or materials	68
3B2	Equipment for testing semiconductor devices	70

C. Materials

3C1	Hetero-epitaxial	70
3C2	Resist	70
3C3	Organo-inorganic compounds	70
3C4	Hydrides of phosphorus, arsenic, or antimony	70
3C5	Silicon carbide (SiC) wafers	70

D. Software

3D1	Development or production of 3A1b to 3A2g or 3B	70
3D2	Use of 3B1a to f or 3B2	70
3D3	Development of lithographic, etching or deposition processes	70
3D4	Development of 3A3	70

E. Technology

3E1	Development or production of 3A, 3B, or 3C	70
3E2	Development or production of microprocessor, microcomputer or microcontroller microcircuits	71
3E3	Other technology	71

Category 4 – Computers

A. Systems, Equipment, and Components

4A1	Electronic computers and related equipment	73
4A2	Deleted	73
4A3	Digital computers, electronic assemblies and related equipment	73
4A4	Computers	74

B. Test, Inspection, and Production Equipment – None

C. Materials – None

Table of Contents

D. Software	
4D1a	Development, production, or use of 4A or 4D 74
4D1b	Development or production of digital computers or electronic assemblies 74
4D2	Support technology controlled by 4E 74
4D3	Specific software 74
E. Technology	
4E1a	Development, production, or use of 4A or 4D 75
4E1b	Development or production of digital computers or electronic assemblies 75
	Technical Note on Adjusted Peak Performance (APP) 76
<u>Category 5 – Telecommunications and Information Security</u>	
<u>Part 1 – Telecommunications</u>	
A. Systems, Equipment, and Components	
5A1a	Electromagnetic pulse, radiation, or temperature rated 77
5A1b	Transmission 77
5A1c	Optical fiber 78
5A1d	Electronically steerable phased array antennae 78
5A1e	Radio direction finding equipment 78
5A1f	Jamming equipment 78
5A1g	Passive Coherent Location 78
B. Test, Inspection, and Production Equipment	
5B1a	Development, production, or use of Category 5 – Part 1 78
5B1b	Development of other transmission or switching equipment 79
C. Materials – None.	
D. Software	
5D1a	Development, production, or use of Category 5 – Part 1 79
5D1b	Support 5E1 79
5D1c	Provide characteristics, function, or features controlled by 5A1 or 5B1 79
5D1d	Development of other telecommunication transmission or switching equipment 79
E. Technology	
5E1a	Development, production, or use (excluding operation) of equipment, functions or features or software controlled by Category 5 – Part 1 79
5E1b	Other satellite, laser, cellular radio, or spread spectrum 79
5E1c	Development or production of other telecommunication transmission or switching equipment 80
<u>Part 2 – Information Security</u>	
A. Systems, Equipment, and Components	
5A2a	Information security equipment 80
B. Test, Inspection, and Production Equipment	
5B2a	Development or production of Category 5 – Part 2 82
5B2b	Measuring 5A2 or 5D2 82
C. Materials – None	
D. Software	
5D2a	Development, production, or use of Category 5 – Part 2 82
5D2b	Support 5E2 82
5D2c1	Having 5A2 or 5B2 characteristics 82
5D2c2	Certifying 5D2c1 82
E. Technology	
5E2	Development, production, or use of equipment or software controlled by Category 5 – Part 2 82

Category 6 – Sensors and Lasers

A. Systems, Equipment, and Components

6A1	Acoustics	83
6A2	Optical sensors	86
6A3	Cameras	89
6A4	Optics	92
6A5	Lasers	94
6A6	Magnetometers, magnetic gradiometers, intrinsic magnetic gradiometers, underwater electric field sensors and compensation systems	98
6A7	Gravity meters, gravity gradiometers	99
6A8	Radar	99

B. Test, Inspection, and Production Equipment

6B4	Optical equipment	100
6B7	Produce, align and calibrate land-based gravity meters	100
6B8	Pulse radar cross-section measurement	100

C. Materials

6C2	Optical sensor materials	101
6C4	Optical materials	101
6C5	Synthetic crystalline laser host material	101

D. Software

6D1	Development or production of 6A4, 6A5, 6A8, or 6B8	101
6D2	Use of 6A2b, 6A8, or 6B8	101
6D3	Other software	101

E. Technology

6E1	Development of 6A, 6B, 6C, or 6D	102
6E2	Production of 6A, 6B, or 6C	102
6E3	Other technology	102

Category 7 – Navigation and Avionics

A. Systems, Equipment, and Components

7A1	Accelerometers	103
7A2	Gyros and angular rate sensors	103
7A3	Inertial systems	103
7A4	Gyro-astro compasses	104
7A5	Global navigation satellite systems	104
7A6	Airborne altimeters	104
7A7	Deleted	104
7A8	Underwater sonar navigation systems	104

B. Test, Inspection, and Production Equipment

7B1	Test, calibration, or alignment of 7A	104
7B2	Characterize mirrors for ring laser gyros	105
7B3	Production of 7A	105

C. Materials – None

D. Software

7D1	Development or production of 7A or 7B	105
7D2	Source code for use of any inertial navigation equipment	105
7D3	Other software	105

E. Technology

7E1	Development of 7A, 7B, or 7D	105
7E2	Production of 7A or 7B	105
7E3	Repair, refurbishing, or overhaul of 7A1 to 7A4	105
7E4	Other technology	106

Table of Contents

Category 8 – Marine

A. Systems, Equipment, and Components		
8A1	Submersible vehicles and surface vessels	107
8A2	Marine systems, equipment and components	108
B. Test, Inspection and Production Equipment		
8B1	Water tunnels	111
C. Materials		
8C1	Syntactic foam	111
D. Software		
8D1	Development, production, or use of 8A, 8B, or 8C	111
8D2	Development, production, repair, overhaul, or refurbishing of propellers for underwater noise reduction	111
E. Technology		
8E1	Development or production of 8A, 8B, or 8C	111
8E2a	Other technology	111

Category 9 – Aerospace and Propulsion

A. Systems, Equipment, and Components		
9A1	Aero gas turbine engines	113
9A2	Marine gas turbine engines	113
9A3	Gas turbine engine propulsion systems	113
9A4	Space launch vehicles and spacecraft	113
9A5	Liquid rocket propulsion systems	113
9A6	Systems and components for liquid rocket propulsion systems	113
9A7	Solid rocket propulsion systems	113
9A8	Components for solid rocket propulsion systems	114
9A9	Hybrid rocket propulsion systems	114
9A10	Launch vehicles, launch vehicle propulsion systems, or spacecraft	114
9A11	Ramjet, scramjet, or combined cycle engines	114
9A12	Unmanned aerial vehicles	114
B. Test, Inspection, and Production Equipment		
9B1	Manufacturing gas turbine blades, vanes, or tip shroud casting	115
9B2	Development of gas turbine engines	115
9B3	Production or test of gas turbine brush seals	115
9B4	Solid state joining of superalloy, titanium, or intermetallic air-foil-to-disk	115
9B5	On-line control systems, instrumentation or automated data acquisition for wind tunnels ..	115
9B6	Acoustic vibration test equipment	115
9B7	Inspecting rocket motor integrity	115
9B8	Transducers for direct measurement of wall skin friction	115
9B9	Tooling for producing turbine engine power metallurgy rotor components	115
9B10	Production of UAVs	115
C. Materials – None		
D. Software		
9D1	Development of 9A, 9B, or 9E3	115
9D2	Production of 9A or 9B	115
9D3	Use of full authority digital electronic engine controls (FADEC)	115
9D4	Other software	115
E. Technology		
9E1	Development of 9A1b, 9A4 to 9A12, 9B, or 9D	116
9E2	Production of 9A1b, 9A4 to 9A11, or 9B	116
9E3	Other technology	116

Sensitive List of Dual-Use Goods and Technologies	119
Very Sensitive List of Dual-Use Goods and Technologies	127
Wassenaar Munitions List	
ML 1 Arms and automatic weapons with caliber 0.50 inches or less	131
ML 2 Armament with caliber greater than 0.50 inches	131
ML 3 Ammunition and fuze setting devices	131
ML 4 Bombs, torpedoes, rockets, missiles, other explosive devices and charges	131
ML 5 Fire control	132
ML 6 Ground Vehicles	132
ML 7 Chemical or biological toxic agents, riot control agents, radioactive materials	133
ML 8 Energetic materials	135
ML 9 Vessels of war, naval equipment	139
ML 10 Aircraft, lighter-than-air vehicles, unmanned airborne vehicles, aero-engines, aircraft equipment	140
ML 11 Electronic equipment	141
ML 12 High velocity kinetic energy weapons systems	141
ML 13 Armored or protective equipment	142
ML 14 Military training	142
ML 15 Imaging or countermeasure	142
ML 16 Forgings, castings, and other unfinished products	143
ML 17 Miscellaneous equipment, materials and libraries	143
ML 18 Production of products controlled by the Munitions List	144
ML 19 Directed energy weapon systems	144
ML 20 Cryogenic and superconductive equipment	145
ML 21 Software	145
ML 22 Technology	145

Equipment, Software and Technology Annex	
1. Introduction	174
2. Definitions	174
3. Terminology	177
<u>Category I</u>	
<u>Item 1: Complete Delivery Systems</u>	
A. Equipment, Assemblies, and Components	
1A1 Rocket systems	178
1A2 Unmanned air vehicle systems	178
B. Test and Production Equipment	
1B1 Production facilities for 1A	178

Table of Contents

C. Material – None.

D. Software

1D1	Use of production facilities in 1B	178
1D2	Coordinate use of 1A subsystems	178

E. Technology

1E1	Development, production, or use of 1A, 1B, or 1D	178
-----	--	-----

Item 2: Complete Subsystems Usable for Complete Delivery Systems

A. Equipment, Assemblies, and Components

2A1	Subsystems for 1A	178
-----	-------------------------	-----

B. Test and Production Equipment

2B1	Production facilities for 2A	179
2B2	Production equipment for 2A	179

C. Materials – None.

D. Software

2D1	Use of production facilities in 2B1	179
2D2	Use of rocket motors or engines in 2A1c	179
2D3	Use of guidance sets in 2A1d	179
2D4	Use of subsystems or equipment in 2A1b3	179
2D5	Use of systems in 2A1e	179
2D6	Use of systems in 2A1f	179

E. Technology

2E1	Development, production, or use of 2A, 2B, 2D	179
-----	---	-----

Category II

Item 3: Propulsion Components and Equipment

A. Equipment, Assemblies, and Components

3A1	Turbojet and turbofan engines	179
3A2	Ramjet/scramjet/pulse jet/combined cycle engines	179
3A3	Rocket motor cases, insulation components and nozzles for 1A or 19A1	179
3A4	Staging mechanisms, separation mechanisms, and interstages for 1A	179
3A5	Liquid and slurry propellant control systems for 1A	180
3A6	Hybrid rocket motors for 1A, 19A1 or 19A2	180
3A7	Radial ball bearings	180
3A8	Liquid propellant tanks	180
3A9	Turboprop engine systems	180

B. Test and Production Equipment

3B1	Production facilities for 3A1 to 3A6, 3A8, 3A9, or 3C	180
3B2	Production equipment for 3A1 to 3A6, 3A8, 3A9, or 3C	180
3B3	Flow-forming machines	180

C. Material

3C1	Interior lining for rocket motor cases for 1A, 19A1 or 19A2	180
3C2	Insulation material for rocket motor cases for 1A, 19A1 or 19A2	180

D. Software

3D1	Use of production facilities and flow-forming machines in 3B1 or 3B3	180
3D2	Use of 3A1, 3A2, 3A4, or 3A9	181
3D3	Development of 3A2 or 3A4	181

E. Technology

3E1	Development, production, or use of 3A1, 3A2, 3A3, 3A4, 3A5, 3A6, 3A9, 3B, 3C, or 3D ..	181
-----	--	-----

Item 4: Propellants, Chemicals and Propellant Production

A. Equipment, Assemblies, and Components – None.

B. Test and Production Equipment

4B1 Production, handling or acceptance testing of liquid propellants 181

4B2 Production, handling, mixing, curing, casting, pressing, machining, extruding or acceptance testing of solid propellants 181

4B3 Batch mixers, continuous mixers, fluid energy mills, metal powder production equipment 181

C. Materials

4C1 Composite and composite modified double base propellants 181

4C2 Fuel substances 181

4C3 Oxidizers/Fuels 182

4C4 Oxidizer substances 182

4C5 Polymeric substances 182

4C6 Other propellant additives and agents 183

D. Software

4D1 Use of 4.B for production and handling of 4.C 183

E. Technology

4E1 Development, production, or use of 4.B and 4C 183

Item 5: [Reserved]

Item 6: Production of Structural Composites, Pyrolytic Deposition and Densification, and Structural Materials

A. Equipment, Assemblies, and Components

6A1 Composite structures, laminates, and manufacturers for use in 1A and 2A 183

6A2 Resaturated pyrolyzed components 183

B. Test and Production equipment

6B1 Production of structural composites, fibers, prepregs, or preforms usable in 1A 184

6B2 Nozzles specially designed for 6E3 processes 184

6B3 Isostatoc presses 184

6B4 Chemical vapor deposition furnaces 184

6B5 Densification and pyrolysis of structural composite rocket nozzles and re-entry nose tips 184

C. Materials

6C1 Resin impregnated fiber prepregs and metal coated fiber preforms for 6A1 184

6C2 Resaturated pyrolyzed materials 184

6C3 Fine grain graphites 184

6C4 Pyrolytic or fibrous reinforced graphites 185

6C5 Ceramic composite materials for use in 1A or 19A1 185

6C6 Silicon-carbide usable in 1A or 19A1 185

6C7 Tungsten, molybdenum, and alloys usable in 1A or 19A1 185

6C8 Maraging steels usable in 1A or 19A1 185

6C9 Titanium-stabilized duplex stainless steel usable in 1A or 19A1 185

D. Software

6D1 Use of 6B1 185

6D2 For 6B3, 6B4, or 6B5 185

E. Technology

6E1 Development, production, or use of 6A, 6B, 6C or 6D 185

6E2 Regulation of temperature, pressures or atmosphere in autoclaves or hydroclaves 185

6E3 Producing pyrolytically derived materials 185

Item 7: [Reserved]

Table of Contents

Item 8: [Reserved]

Item 9: Instrumentation, Navigation, and Direction Finding

A. Equipment, Assemblies, and Components

9A1	Integrated flight instrument systems for 1A or 19A1	185
9A2	Gyro-astro compasses	185
9A3	Linear accelerometers	186
9A4	Gyros for 1A, 19A1, or 19A2	186
9A5	Continuous output accelerometers or gyros	186
9A6	Equipment using accelerometers in 9A3 or 9A5 or gyros in 9A4 or 9A5	186
9A7	Integrated navigation systems in 1A, 19A1 or 19A2	186
9A8	Three axis magnetic heading sensors	186

B. Test and Production equipment

9B1	Production equipment and other test, calibration, and alignment equipment used in 9A ..	186
9B2	Equipment	187

C. Materials – None.

D. Software

9D1	Use of 9A or 9B	187
9D2	Integration in 9A1	187
9D3	Integration in 9A6	187
9D4	Integration in 9A7	187

E. Technology

9E1	Development, production, or use of 9A, 9B, or 9D	187
-----	--	-----

Item 10: Flight Control

A. Equipment, Assemblies, and Components

10A1	Hydraulic, mechanical, electro-optical, or electro-mechanical flight control systems	188
10A2	Attitude control equipment	188
10A3	Flight control servo valves	188

B. Test and Production Equipment

10B1	Test, calibration, and alignment	188
------	--	-----

C. Materials – None.

D. Software

10D1	Use in 10A or 10B	188
------	-------------------------	-----

E. Technology

10E1	Integration of air vehicle fuselage, propulsion system, and lifting control surfaces for 1A or 19A2	188
10E2	Integration of flight control, guidance, and propulsion data into a flight management system for 1A	188
10E3	Development, production, or use of 10A, 10B, or 10D	188

Item 11: Avionics

A. Equipment, Assemblies, and Components

11A1	Radar or laser radar systems for 1A	188
11A2	Passive sensors for 1A	188
11A3	Receiving equipment for Global Navigation Satellite Systems (GNSS)	188
11A4	Electronic assemblies for 1A	188

B. Test and Production Equipment – None.

C. Materials – None.

D. Software	
11D1 Use of 11A1, 11A2, or 11A4	189
11D2 Use of 11A3	189
E. Technology	
11E1 Protection of avionics and electrical subsystems against EMP and EMI	189
11E2 Development, production, or use of 11A or 11D	189
<u>Item 12: Launch Support</u>	
A. Equipment, Assemblies, and Components	
12A1 Apparatus and devices for handling, control, activation and launching 1A, 19A1, or 19A2	189
12A2 Vehicles for transport, handling, control, activation and launching 1A	189
12A3 Gravity meters, gravity gradiometers in 1A	189
12A4 Telemetry and telecontrol in 1A, 19A1, or 19A2	189
12A5 Precision tracking systems for 1A, 19A1, or 19A2	189
12A6 Thermal batteries for 1A, 19A1, or 19A2	189
B. Test and Production Equipment – None.	
C. Materials – None.	
D. Software	
12D1 Use of 12A1	190
12D2 Determination of vehicle position throughout its flight path in 1A, 19A1, or 19A2	190
12D3 Use of 12A4 or 12A5 for 1A, 19A1, or 19A2	190
E. Technology	
12E1 Development, production, or use of 12A or 12D	190
<u>Item 13: Computers</u>	
A. Equipment, Assemblies, and Components	
13A1 Analog computers, digital computers, or digital differential analyzers for 1A	190
B. Test and Production Equipment – None.	
C. Materials – None.	
D. Software – None.	
E. Technology	
13E1 Development, production, or use of 13A	190
<u>Item 14: Analogue-to-Digital Converters</u>	
A. Equipment, Assemblies, and Components	
14A1 Analog-to-digital converters for 1A	190
B. Test and Production Equipment – None.	
C. Materials – None.	
D. Software – None.	
E. Technology	
14E1 Development, production, or use of 14A	190
<u>Item 15: Test Facilities and Equipment</u>	
A. Equipment, Assemblies, and Components – None.	
B. Test and Production Equipment	
15B1 Vibration test equipment for 1A or 2A	190
15B2 Wind-tunnels for 1A, 2A, 19A, or 20A	191

Table of Contents

15B3	Test benches/stands for 1A, 2A, 19A1, 19A2, or 20A	191
15B4	Environmental chambers for 1A, 2A, 19A, or 20A	191
15B5	Accelerators for 1A, 2A, 19A1, 19A2, or 20A	191
C. Materials – None.		
D. Software		
15D1	Use of 15B to test 1A, 2A, 19A1, 19A2, or 20A	191
E. Technology		
15E1	Development, production, or use of 15B or 15D	192
<u>Item 16: Modelling-Simulation and Design Integration</u>		
A. Equipment, Assemblies, and Components		
16A1	Hybrid computers for 1A or 2A	192
B. Test and Production Equipment – None.		
C. Materials – None.		
D. Software		
16D1	Modeling, simulation, or design integration of 1A or 2A	192
E. Technology		
16E1	Development, production, or use of 16A or 16D	192
<u>Item 17: Stealth</u>		
A. Equipment, Assemblies, and Components		
17A1	Devices for reduced observables for 1A, 2A, 19A, or 20A	192
B. Test and Production Equipment		
17B1	Radar cross section measurement for 1A, 2A, 19A1, or 19A2	192
C. Materials		
17C1	Materials for reduced observables for 1A, 2A, or 19A	192
D. Software		
17D1	For reduced observables for 1A, 2A, or 19A	192
E. Technology		
17E1	Development, production, or use of 17A, 17B, 17C, or 17D	192
<u>Item 18: Nuclear Effects Protection</u>		
A. Equipment, Assemblies, and Components		
18A1	Radiation-hardened microcircuits for 1A	192
18A2	Detectors for 1A	192
18A3	Radomes for 1A	193
B. Test and Production Equipment – None.		
C. Materials – None.		
D. Software – None.		
E. Technology		
18E1	Development, production, or use of 18A	193

Item 19: Other Complete Delivery Systems

A. Equipment, Assemblies, and Components	
19A1 Rocket systems range equal to or greater than 300 km	193
19A2 Unmanned aerial vehicle systems range equal to or greater than 300 km	193
19A3 Unmanned aerial vehicle system	193
B. Test and Production Equipment – None.	
C. Materials – None.	
D. Software	
19D1 Coordinating function in 19A1 or 19A2	193
E. Technology	
19E1 Development, production, or use of 19A1 or 19A2	193

Item 20: Other Complete Subsystems

A. Equipment, Assemblies, and Components	
20A1 Individual rocket stages, solid propellant rocket motors, or liquid propellant rocket engines	193
B. Test and Production Equipment	
20B1 Production facilities for 20A	194
20B2 Production equipment for 20A	194
C. Materials – None.	
D. Software	
20D1 For 20B1	194
20D2 Use of rocket motors or engines in 20A1b	194
E. Technology	
20E1 Development, production, or use of 20A, 20B, or 20D	194
Units, Constants, Acronyms and Abbreviations Used in This Annex	195
Table of Conversions Used in this Annex	197
Statement of Understanding	197

International Atomic Energy Agency

Information Circular 254 Part 1

Communications received from member states	199
Note Verbale	200
Guidelines for nuclear transfers	201

Annex A: Trigger List Referred to in Guidelines

General Notes	205
Technology Controls	205
Definitions	205

Material and equipment

1 Source and special fissionable material	206
1.1 Source material	206
1.2 Special fissionable material	206
2 Equipment and non-nuclear materials	206
2.1 Nuclear reactors	206
2.2 Non-nuclear materials for reactors	206
2.3 Plant for the reprocessing of irradiated fuel elements	206
2.4 Plants for the fabrication of nuclear reactor fuel elements	206

Table of Contents

2.5	Plants for the separation of isotopes of uranium	206	
2.6	Plants for the production or concentration of heavy water, deuterium and deuterium compounds	206	
2.7	Plants for the conversion of uranium and plutonium	206	
Annex B: Clarification of Items on the Trigger List			
1	Nuclear reactors	207	
1.1	Complete nuclear reactors	207	
1.2	Nuclear reactor vessels	207	
1.3	Nuclear reactor fuel charging and discharging machines	207	
1.4	Nuclear reactor control rods and equipment	207	
1.5	Nuclear reactor pressure tubes	207	
1.6	Zirconium tubes	207	
1.7	Primary coolant pumps	207	
1.8	Nuclear reactor internals	207	
1.9	Heat exchangers	208	
1.10	Neutron detection and measuring instruments	208	
2	Non-nuclear materials for reactors	208	
2.1	Deuterium and heavy water	208	
2.2	Nuclear grade graphite	208	
3	Plants for reprocessing of irradiated fuel elements	208	
3.1	Irradiated fuel element chopping machines	208	
3.2	Dissolvers	209	
3.3	Solvent extractors and solvent extraction equipment	209	
3.4	Chemical holding or storage devices	209	
4	Plants for fabrication of nuclear reactor fuel elements	209	
5	Plants for separation of isotopes of uranium	210	
5.1	Gas centrifuges	210	
5.2	Auxiliary systems for gas centrifuge enrichment plants	212	
5.3	Gaseous diffusion enrichment	213	
5.4	Auxiliary systems for gaseous diffusion enrichment	213	
5.5	Systems, equipment and components for use in aerodynamic enrichment plants	214	
5.6	Systems, equipment and components for use in chemical or ion exchange enrichment plants	216	
5.7	Systems, equipment and components for use in laser-based enrichment plants	218	
5.8	Systems, equipment and components for use in plasma separation enrichment plants	219	
5.9	Systems, equipment and components for use in electromagnetic enrichment plants	220	
6	Plants for production or concentration of heavy water, deuterium and deuterium compounds	221	
6.1	Water-hydrogen sulphide exchange towers	222	
6.2	Blowers and compressors	222	
6.3	Ammonia-hydrogen exchange towers	222	
6.4	Tower internals and stage pumps	222	
6.5	Ammonia crackers	222	
6.6	Infrared absorption analyzers	222	
6.7	Catalytic burners	222	
6.8	Complete heavy water upgrade systems or columns therefor	222	
7	Plants for conversion of uranium and plutonium	222	
7.1	Plants for the conversion of uranium	222	
7.2	Plants for the conversion of plutonium	223	
Annex C: Criteria For Levels of Physical Protection			225
Categorization of nuclear material			227
Comparison table of changes to the guidelines for nuclear transfers (Part 1)			228

<u>Information Circular 254 Part 2</u>	
Communications received from member states	231
Note Verbale	232
Guidelines for Transfers of Nuclear-Related Dual-Use Equipment, Materials, Software, and Related Technology	233
Annex—List of Nuclear-Related Dual-Use Equipment, Materials, Software, and Related Technology	
Abbreviations	235
General Note	235
Technology controls	235
General software note	236
Definitions	236
<u>1. Industrial Equipment</u>	
A. Equipment, Assemblies, and Components	
1A1 High-density radiation shielding windows	239
1A2 Radiation-hardened TV cameras or lenses	239
1A3 Robots, end-effectors, and control units	239
1A4 Remote manipulators	240
B. Test and Production Equipment	
1B1 Flow-forming and spin-forming machines	240
1B2 Machine tools	240
1B3 Dimensional inspection machines, instruments or systems	242
1B4 Controlled atmosphere induction furnaces and power supplies	242
1B5 Isotatic presses	243
1B6 Vibration test systems	243
1B7 Vacuum or controlled atmosphere metallurgical melting and casting furnaces	243
C. Materials – None.	
D. Software	
1D1 Use of 1A3, 1B1, 1B3, 1B5, 1B6a, 1B6b, 1B6d, or 1B7	243
1D2 Development, production, or use of 1B2	243
1D3 Coordination of five or more interpolating axes	243
E. Technology	
1E1 Development, production, or use of 1A through 1D	244
<u>2. Materials</u>	
A. Equipment, Assemblies, and Components	
2A1 Crucibles	244
2A2 Platinized catalysts	244
2A3 Composite tubes	244
B. Test and Production Equipment	
2B1 Tritium facilities or plants	244
2B2 Lithium isotope separation facilities	244
C. Materials	
2C1 Aluminum alloys	244
2C2 Beryllium metal	245
2C3 Bismuth	245
2C4 Boron	245
2C5 Calcium	245
2C6 Chlorine trifluoride	245
2C7 Fibrous or filamentary materials	245
2C8 Hafnium metal	245

Table of Contents

2C9	Lithium	245
2C10	Magnesium	246
2C11	Maraging steel	246
2C12	Radium-226	246
2C13	Titanium alloys	246
2C14	Tungsten, tungsten carbide and alloys	246
2C15	Zirconium	246
2C16	Nickel powder and porous nickel metal	246
2C17	Tritium, tritium compounds	246
2C18	Helium-3	246
2C19	Alpha-emitting radionuclides	246
D. Software – None.		
E. Technology		
2E1	Development, production, or use of 2A through 2D	247
<u>3. Uranium Isotope Separation Equipment and Components (other than trigger list items)</u>		
A. Equipment, Assemblies and Components		
3A1	Frequency changers or generators	247
3A2	Lasers, laser amplifiers and oscillators	247
3A3	Valves	248
3A4	Superconducting solenoidal electromagnets	248
3A5	High-power direct current power supplies	248
3A6	High-voltage direct current power supplies	248
3A7	Pressure transducers	248
3A8	Vacuum pumps	248
B. Test and Production Equipment		
3B1	Electrolytic cells for fluorine production	248
3B2	Rotor fabrication or assembly, rotor straightening, bellows-forming mandrels and dies	249
3B3	Centrifugal multiplane balancing machines	249
3B4	Filament winding machines	249
3B5	Electromagnetic isotope separators	249
3B6	Mass spectrometers	249
C. Materials – None.		
D. Software		
3D1	Use of 3B3 or 3B4	250
E. Technology		
3E1	Development, production, or use of 3A through 3D	250
<u>4. Heavy Water Production Plant Related Equipment (other than trigger list items)</u>		
A. Equipment, Assemblies, and Components		
4A1	Packings for separating heavy water from ordinary water	250
4A2	Pumps for circulating potassium amide catalyst in liquid ammonia	250
4A3	Turboexpanders or turboexpander-compressor sets	250
B. Test and Production Equipment		
4B1	Water-hydrogen sulfide exchange tray columns and internal contactors	250
4B2	Hydrogen-cryogenic distillation columns	250
4B3	Ammonia synthesis converters or synthesis units	250
C. Materials – None.		
D. Software – None.		
E. Technology		
4E1	Development, production, or use of 4A through 4D	251

5. Test and Measurement Equipment for the Development of Nuclear Explosive Devices

A. Equipment, Assemblies, and Components

5A1	Photomultiplier tubes	251
-----	-----------------------------	-----

B. Test and Production Equipment

5B1	Flash X-ray generators or pulsed electron accelerators	251
5B2	Multistage light gas guns or other high-velocity gun systems	251
5B3	Mechanical rotating mirror cameras	251
5B4	Electronic streak cameras, electronic framing cameras, tubes, and devices	251
5B5	Instrumentation for hydrodynamic experiments	252
5B6	High-speed pulse generators	252

C. Materials – None.

D. Software – None.

E. Technology

5E1	Development, production, or use of 5A through 5D	252
-----	--	-----

6. Components for Nuclear Explosive Devices

A. Equipment, Assemblies, and Components

6A1	Detonators and multipoint initiation systems	253
6A2	Firing sets and pulse generators	253
6A3	Switching devices	253
6A4	Pulse discharge capacitors	253
6A5	Neutron generator systems	253

B. Test and Production Equipment – None.

C. Materials

6C1	High explosive substances or mixtures	253
-----	---	-----

D. Software – None.

E. Technology

6E1	Development, production, or use of 6A through 6D	253
-----	--	-----

	Comparison table of changes to the guidelines for nuclear transfers (Part 2)	255

	Media Release: 2008 Australia Group Plenary	267
	Australia Group Export Control List: Chemical Weapons Precursors	268

Table of Contents

Control List of Dual-Use Chemical Manufacturing Facilities and Equipment and Related Technology	270
I. Manufacturing facilities and equipment	270
1. Reaction vessels, reactors, or agitators	270
2. Storage tanks, containers, or receivers	270
3. Heat exchangers or condensers	270
4. Distillation or absorption columns	271
5. Filling equipment	271
6. Valves	271
7. Multi-walled piping	271
8. Pumps	271
9. Incinerators	272
II. Toxic gas monitoring systems and detectors	272
III. Related technology	272
Definitions of terms	272
Control List of Dual-Use Biological Equipment and Related Technology	
I. Equipment	274
1. Complete containment facilities at P3 or P4 containment levels	274
2. Fermenters	274
3. Centrifugal separators	274
4. Cross flow filtration	274
5. Freeze-drying	274
6. Protective and containment	274
7. Aerosol inhalation chambers	274
8. Spraying or fogging systems and components therefore	274
II. Related Technology	275
Definition of Terms	275
List of Biological Agents for Export Control	277
List of Plant Pathogens for Export Controls	279
List of Animal Pathogens for Export Control	283
Organization for the Prohibition of Chemical Weapons	
Annex on Chemicals	
A. Guidelines for schedules of chemicals	285
B. Schedules of chemicals	285
<u>Schedule 1</u>	
A. Toxic chemicals:	
(1) Phosphonofluoridates	286
(2) Phosphoramidocyanidates	286
(3) Phosphonothiolates	286
(4) Sulphur mustards	286
(5) Lewisites	286
(6) Nitrogen mustards	286
(7) Saxitoxin	286
(8) Ricin	286
B. Precursors	
(9) Phosphonyldifluorides	286
(10) Phosphonites	286
(11) Chlorosarin	286
(12) Chlorosoman	286

Schedule 2

A. Toxic chemicals:

(1) Amiton	287
(2) PFIB	287
(3) BZ	287

B. Precursors:

(4) Phosphorus atom bonded with one methyl, ethyl, or propyl group, not in Schedule 1	287
(5) Phosphoramidic dihalides	287
(6) Phosphoramidates	287
(7) Arsenic trichloride	287
(8) Hydroxyacetic acid	287
(9) Quinuclidine	287
(10) N, N-Dialkyl aminoethyl-2-chlorides	287
(11) N, N-Dialkyl aminoethane-2-ols	287
(12) N, N-Dialkyl aminoethane-2-thiols	287
(13) Thiodiglycol	287
(14) Pinacolyl alcohol	287

Schedule 3

A. Toxic chemicals:

(1) Phosgene	287
(2) Cyanogen chloride	287
(3) Hydrogen cyanide	287
(4) Chloropicrin	287

B. Precursors:

(5) Phosphorus oxychloride	287
(6) Phosphorus trichloride	287
(7) Phosphorus pentachloride	287
(8) Trimethyl phosphite	287
(9) Triethyl phosphite	287
(10) Dimethyl phosphite	287
(11) Diethyl phosphite	287
(12) Sulphur monochloride	287
(13) Sulphur dichloride	287
(14) Thionyl chloride	287
(15) Ethyldiethanolamine	287
(16) Methyldiethanolamine	287
(17) Triethanolamine	287
